

Photo Desktop 2 Single-User-License License Agreement

NOTICE: By purchasing a Photo Desktop 2 Single User License (hereafter the license) you agree to every point mentioned below and in the next paragraph 'Photo Desktop 2 License agreement'.

- The license is a personal license for one installation.
- The license is not transferable
- The license is not refundable
- The license unlocks every feature offered by the Photo Desktop application, if available on your system / configuration
- The license grants the owner the right to install it on ONE SINGLE COMPUTER
- The license will remain valid for every 2.x version of Photo Desktop, optional 3.x or later versions will require a new license.
- The license and its key may be used by multiple users on one and the same computer, for the intention of supporting 'Fast User Switching'.
- The license and its key may not be used by the same user on different computers.
- The license will remain valid for Photo Desktop version 2.x indefinitely until one of the following:
 - The evidence appears that the license or its key has been transferred or distributed in any way not allowed by this license, intentionally or not.
 - The license or key has been converted, by an upgrade, to a different Photo Desktop license in the future.
- The author remains the privilege of disabling licenses that are no longer valid when he seems fit.

Photo Desktop 2 License agreement

NOTICE: By installing, operating, copying, distributing, or otherwise using Photo Desktop 2, you agree to the terms of this License Agreement. If you do not agree to the terms of this Agreement, DO NOT INSTALL Photo Desktop 2.

NOTICE: This agreement covers all of the Photo Desktop 2 components, including the Photo Desktop 2 application, the Photo Desktop 2 Editor application, the Photo Desktop 2 Screensaver and the AtCoreToolbox framework distributed with this application.

- You are allowed to distribute this application and make copies of your own, this does not include any license-keys, since they are personal and may not be copied or distributed in any other way. It's advised, however, to download the latest version from <http://www.colourful-apps.com/photodesktop>.
- This is a SHAREWARE application, meaning some features will only be available after purchasing a license-key.
- You are not entitled to any support by the author, although the author may be contacted through e-mail (support@colourful-apps.com) for feedback and questions.
- You may not reverse engineer, decompile or otherwise modify this application, nor may you use or re-use any part of this application other than for the purpose this application was created for.
- This application and its source code are the intellectual property of the author.
- You are aware of its system requirements and your responsibility of confirming that it functions on your configuration before considering purchasing a license. See the disclaimer for more information.
- You can not hold the author responsible for any damage of whichever kind that this application may cause you or your business.
- You are not allowed to share, distribute, sell or re-sell the license-key or license-keys you have purchased for this application, nor are you allowed to use any license-keys you haven't purchased.

- No rights can be derived from this agreement.

Disclaimer & System Requirements

Disclaimer

USE THIS APPLICATION AT YOUR OWN RISK.

Photo Desktop 2 is shareware, some of the functionality may not be (completely) available without purchasing a license, please notice that all of Photo Desktop 1 functionality and more will still be available when used without a license.

Although this application was developed with the utmost care, and tested thoroughly, the author cannot be held responsible for any damage of any kind that this application may cause.

Important

This application is utilizing Apple's Core-Image as well as OpenGL functionality of your computer and relies heavily on the capabilities of your videocard / chip. Although this application has been tested using various computer configuration it may not work on every computer. The supplied system requirements are a mere guideline. It is advised to install the application and run it before considering purchasing a license key.

System Requirements

Minimum requirements

- Mac OS X 10.4 (Tiger)
- 1.5 Ghz PowerPC G4 processor
- 512 MB system memory
- Core-Image capable videocard with 64MB memory

Some features like 'live updates' while editing may not be available using minimal configurations.

Optimal requirements

- Mac OS X 10.4.9 (Tiger) or later
- 2 Ghz Dual PowerPC G5 or Intel core processor or better
- 1 GB system memory
- Core-Image capable videocard with 128MB memory or more

Depending on your actual configuration you may need to scale the quality of live-updates or the screen-saver for optimal performance.

Multi-monitor systems are fully supported but may have different requirements for optimal performance, Live updates are not recommended.
